Career Objective

Information Technologist focused on solving your operational issues through advanced technologies. A perfect fit for small or medium size organization as process improvement thru database design and programming for efficiency. Manages all technology issues from networking to staff assistance using workstations and laptops.

Work Philosophy

I believe in helping others work smarter, not harder. I explain complex issues with clear language in support of creative problem solving and increased productivity. I demonstrate how to plan and make things better, while constantly adding to my own knowledge base for the future.

Work History & Notable Achievements

OSUMC Government Resource Center
Health Policy Institute of Ohio
Gap Inc. Direct
United Way of Central Ohio
Fortis Health

HIT Consultant
Director of Technology
Database Admin Consultant
Data Wrangler
